CONSPIRACY THEORIES

What are they? Why do they flourish?

BE WARNED: THE COVID-19 PANDEMIC HAS SEEN A RISE IN HARMFUL AND MISLEADING CONSPIRACY THEORIES. IT MAY BE DIFFICULT TO RECOGNIZE THEM OR KNOW HOW BEST TO DEAL WITH THEM.

- 1. What are they?**

→ The belief that events are secretly manipulated behind the scenes by powerful forces with negative intent.
- 2. Conspiracy theories have these 6 things in common**

- 1 An alleged, secret plot
 - 2 A group of conspirators
 - 3 'Evidence' that seems to support the conspiracy theory
 - 4 They falsely suggest that nothing happens by accident and that there are no coincidences; nothing is as it appears and everything is connected.
 - 5 They divide the world into good or bad.
 - 6 They scapegoat people and groups.
- 3. Why do they flourish?**

→ They offer an explanation of events or situations which are difficult to understand and bring a false sense of control and agency. This need is heightened in times of uncertainty like the COVID-19 pandemic.
- 4. How do they take root?**

→ Conspiracy theories often start as a suspicion. They ask who is benefiting from the event or situation and thus identify the conspirators. Any 'evidence' is then forced to fit the theory.

Once they have taken root, conspiracy theories can grow quickly. They are hard to refute because any person who tries is seen as being part of the conspiracy.
- 5. Why do people spread them?**

→ There are different reasons: Most believe they are true. Others deliberately want to provoke, manipulate or target people for political or financial reasons. Beware: They can come from many sources e.g. internet, friends, relatives.

CONSPIRACY THEORIES

Is this one? Check before sharing

BE WARNED: THE COVID-19 PANDEMIC HAS SEEN A RISE IN HARMFUL AND MISLEADING CONSPIRACY THEORIES. IT MAY BE DIFFICULT TO RECOGNIZE THEM OR KNOW HOW BEST TO DEAL WITH THEM.

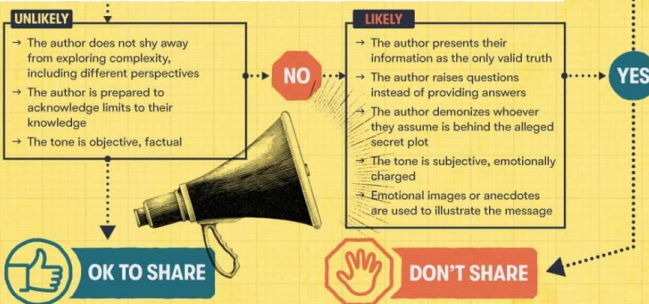

Check the author – who is writing this and why?

Check the source – Is it reliable and reputable?

Check the tone and style – Is it balanced and fair or sensationalist and one-dimensional?

What is a real conspiracy?

Real conspiracies large and small DO exist. They are more often centred on single, self-contained events or an individual like an assassination or a coup d'état. They are unearthed by whistle-blowers and the media, using verifiable facts and evidence.

Looking for A REAL CONSPIRACY?

In 2006, the U.S. District Court in Washington DC (USA) ruled that major cigarette companies were guilty of conspiracy. For decades, they had hidden evidence of health risks attached to smoking to promote higher sales.

CONSPIRACY THEORIES

Prebunking and debunking

BE WARNED: THE COVID-19 PANDEMIC HAS SEEN A RISE IN HARMFUL AND MISLEADING CONSPIRACY THEORIES. IT MAY BE DIFFICULT TO RECOGNIZE THEM OR KNOW HOW BEST TO DEAL WITH THEM.

STOPPING THE SPREAD OF CONSPIRACY THEORIES IS CHALLENGING. THERE IS NO ONE-SIZE-FITS-ALL APPROACH. IT DEPENDS ON THE LEVEL OF EXPOSURE. PEOPLE WHO FIRMLY BELIEVE IN CONSPIRACY THEORIES ARE EXTREMELY DIFFICULT TO REACH.

Level 1: Low exposure to conspiracy theories

PREBUNKING - Empowered people are more resilient:

- Warn people early on that conspiracy theories exist
- Encourage rational thinking, questioning and fact-checking
- Alert people about the arguments behind the most common COVID-19 conspiracy theories and the key traits of conspiratorial thinking - suspicion of official accounts, immunity to contrary evidence, reinterpreting random events as part of a broader pattern.

Level 2: High exposure to conspiracy theories

DEBUNKING - Facts and logic matter

DO's:

- ✓ Focus on the facts you want to communicate, not the myth you want to debunk
- ✓ Choose your target - the author, source or logic behind the conspiracy theory
- ✓ Always state clearly that the information is wrong, before quoting a conspiracy theory
- ✓ Provide a fact-based alternative explanation
- ✓ If possible, use visual aids to back your argument

DON'Ts:

- ✗ Don't focus on the conspiracy theory first. Don't reinforce it
- ✗ Don't overwhelm with information
