Title of activity	<i>Bias Bingo</i>
--------------------------	-------------------

Note
<i>This Bingo card is an example and should be edited to better reflect the examples that will be provided to your group of students. Pay attention to the fact that it should be possible for students to get a bingo (one horizontal, vertical, or diagonal line complete) based on the examples you provide them with. If necessary, it is therefore possible to switch around the words on the bingo card or to add in new words that better align with the examples provided.</i>
